

Appl. No. : **10/612,395**
Filed : **July 2, 2003**

SUBSTANCE OF INTERVIEW

On January 2, 2008, Applicants' representative, Ronald Schoenbaum, conducted a telephone interview with Examiner Burgess to discuss the outstanding Office Action. During the interview, Mr. Schoenbaum explained Applicants' position that Linden (U.S. Pub. 2002/012882) does not disclose an event history server that implements a "query interface" through which one or more applications retrieve the event data associated with particular users "at least by event type and event time of occurrence," as recited in claim 1. Mr. Schoenbaum also proposed amending claim 1 to add the following language: "wherein the event history server is capable of responding to a query submitted by an application via said query interface by identifying particular events that match event criteria included in said query, and by returning the event data for said particular events." In addition, Mr. Schoenbaum proposed adding similar language to independent claim 55. Examiner Burgess suggested proceeding with the proposed amendments. No other claims, references or issues were discussed, and no agreement was reached.
